Fachlicher Wahlpflichtbereich Volkswirtschaftslehre (Bereich B)

70 972 Advanced Monetary Economics (englisch)

4 SWS					
VL/UE	Mo	12-14	wöch. (1)	SPA 1, 125	L. Weinke
	Di	10-12	wöch. (2)	SPA 1, 125	L. Weinke
1) findet ab 28.04.2025 statt ; Übung					
2) findet ab 15.04.2025 statt ; Vorlesung					

This course teaches new developments in the field of monetary economics.

We start with a refresher on the dynamic New Keynesian model. We then discuss some recent extensions of the New Keynesian model. Examples include open economy models as well as models with financial frictions. Those features are empirically motivated and their presence also has important normative implications, as we are going to see. In the final part of the course, we discuss the recently emerging HANK models. Throughout the course, we assess the empirical relevance of the theoretical models under consideration, and we also develop the techniques that are necessary to work with the concepts that are presented.

The course focuses on helping students understand the theoretical rationale for competition policy and providing students with an understanding of the practice of competition policy by discussing the relevant legal and institutional framework and some antitrust cases. In particular, the course covers the following topics:

- Brief history of competition policy
- Review: static competition models
- Collusion
- Horizontal mergers
- Vertical relations
- Innovation and R&D
- Two sided markets

Course Content: What is the effect of migration and diversity on cultural change and social conflict? In this course, we will examine how international and regional migration shapes not only economic and cultural dynamics but also social and political tensions within both destination and origin countries. Synthesizing findings from seminal studies in the field and analyzing their empirical strategies, we will identify and critically evaluate the channels through which migration can alter values, norms, political preferences, and contribute to conflicts over identity, resources, and power. A key focus will be on how migration or ethnic diversity can exacerbate or mitigate conflicts, exploring the role of factors like economic competition, cultural assimilation, and political representation in shaping host society responses to new migrants. We will analyze empirical methods used to assess these dynamics, including instrumental variable methods, differences-in-differences, regression discontinuity design, and other strategies to rigorously assess causality. Through in-depth critiques and replications of recent papers, students will develop skills to assess research quality and relevance by preparing referee reports and conducting comparative analyses. Special attention will be given to case studies of migration-related conflicts, providing students with practical examples of how conflict emerges or is resolved in contexts of significant demographic change. This course is co-taught with Prof. Anselm Hager. #BIM Berliner Institut für empirische Integrations- und Migrationsforschung

Learning objective: Students gain knowledge of recent advances in migration economics, particularly applied empirical analyses in the intersection of migration, economic development, political economy and labor economics with a focus on migration based changes in preferences, norms, and values in host and home communities. They are able to critically evaluate research on these topics and assess strengths and weaknesses of causal claims in economics papers. Students are equipped to present papers in an academic setting and replicate seminal papers. The students are able to identify gaps in the literature and develop research proposals that are empirically sound and add to the body of work in migration economics and political economy in a meaningful way.

Organisatorisches:

StO/PO MA 2016: 6 LP, Modul: "Applied Migration and Cultural Economics"
StO/PO MEMS 2016: 6 LP, Modul: "Applied Migration and Cultural Economics", Major: Macroeconomics

Prüfung:

Portfolio exam: The first assignment is to draft referee reports for several research papers (each about 500 words). The second assignment is to give one or several presentations on one research paper, a paper critique, as well as an empirical replication of a seminal paper. The third assignment is to draft an original research proposal (about 2,500 words). The final grade will be given/ will be awarded for the portfolio of all three assignments.

SoSe 2025: Note! Binding exam registration via AGNES already until April 25th 2025.

701075 European Economic History II (1914 - up to now) (englisch)

4 SWS					
VL/UE	Di	14-16	wöch.	SPA 1, 125	N. Wolf
	Do	12-14	wöch.	SPA 1, 22	T. Stieglitz

The course deals with the economic development of Europe from the beginning of the First World War up to the current situation from a historical perspective. Key topics include the economics of the two wars, European hyperinflations, the great depression, the bloc-wise economic integration in Western and Eastern Europe, the Golden Age of Growth, the economics of stagflation, global integration and global imbalances in a long-run perspective.

The intention of the course is to familiarize students with the standard tool of modern economic theory and to train them in applying these tools to actual economic problems. It is particularly devoted to market failures and welfare economics. The first part (Part III in MWG) outlines properties of competitive markets and welfare analysis in a partial equilibrium context. It then focuses on the three classical conditions under which market outcomes lead to an inefficient allocation of resources: externalities, imperfect competition and asymmetric information. The second part (Part V in MWG) addresses fundamental issues of welfare economics from the perspective of a policy maker who designs and implements collective decisions. It focuses in particular on social choice theory, the foundations of bargaining and welfare economics, and mechanism design. The course addresses these issues both from a positive and normative perspective.

The course reviews the main topics and models of the incentive theory. It focuses on the principal-agent paradigm where the principal delegates an action to a single agent through the take-it-or-leave-it offer of a contract. Major topics are represented by the problem of adverse selection, which occurs when the agent learns some piece of information relevant to the contractual relationship, and the problem of moral hazard, which appears as soon as the agent's actions are not observable. First, the trade-offs that emerge in these contexts are characterized: the rent extraction-efficiency trade-off under adverse selection and the trade-offs between the extraction of limited liability rent and efficiency and also between insurance and efficiency under moral hazard.

Then, extensions of the basic framework to more complex environments are discussed. Mixed models with adverse selection, moral hazard and nonverifiability of the state of the world are also treated. Principal-agent models with adverse selection and moral hazard are finally considered in a dynamic context.

This course provides an overview on the theory of economic design. It covers the optimal bidding in a given auction format and the optimal de-sign of auctions from the auctioneer's perspective. Moreover, it deals with allocation problems with-out money. Topics to be covered include: Optimal bidding in standard auctions; the revenue-equivalence theorem; optimal auctions and mechanism design; interdependent values; matching mechanisms.

Recommended module or comparable previous knowledge: "Introduction to Advanced Microeconomic Analysis" or another course dealing with game theory with asymmetric information.

Location: DIW Berlin, Mohrenstraße 58, 10117 Berlin. Karl Popper Room 2nd floor.

In this seminar, the participants shall prepare and present a seminar paper. The seminar deals with changes and new developments in the theoretical and empirical literature on monetary policy. Topics covered through lectures and seminar papers include the following: the appropriate mandates and objective function of central banks, the relationship between monetary policy and financial supervision, the role of the exchange rates, the functioning of monetary policy in a monetary union, the importance of fiscal dominance, quantitative easing during financial crises, the role of communication of objectives and policies, the functioning of central bank committees, transparency and independence and accountability, global coordination of monetary policy, the international role of the euro and the US dollar. The course will first start with a series of lectures addressing these various issues. The seminar participants are then asked to prepare a seminar paper on one of the issues, which then has to be presented and discussed towards the end of the semester. To allow an intensive dialogue among the students, the seminar is organized in block classes. Many topics are closely related to each other.

Discussion of seminar topics: 29.04., 30.04.2025

Presentation and discussion of seminar papers: 08.07., 09.07.2025

Part of the Seminar: Ungraded presentation and discussion.

Restriction to participation: 20

Registration: 24.03.2025 - 30.03.2025 via e-mail to mfratzscher@diw.de

Please indicate your program, your matriculation number and briefly outline why you are interested in this seminar and how it fits into your study plans.

F. Kersting,
N. Wolf

In this seminar, we will deal with empirical research from two angles: First, we introduce core concepts from philosophy of science that are relevant for empirical research, e.g., critical realism and causality. Second, we practice conducting empirical research by critically reading and replicating existing research.

A component of the seminar is an ungraded presentation.

Required: A good understanding of econometrics (OLS and causal inference). Bachelor students are required to have taken the course "Introduction to Econometrics".

Max. 20 participants.

Application: Please send a mail to Nikolaus Wolf (nikolaus.wolf@wiwi.hu-berlin.de) February 15 until March 31, 2025 indicating also the program you study. If there are more applicants than spots, we will draw a lottery in advance and let you know about the result.

N. Wolf

In this seminar, we analyse the rise of Germany to a leading trade nation since 1870. We discuss the historical context, basic theoretical concepts on foreign trade, and modern empirical approaches to the study of trade. Students will analyse empirically specific topics, including the role of tariffs for imports and domestic production, the political economy of protectionism, the role of changes in global transport technology, or export subsidies.

A component of the seminar is an ungraded presentation.

Max. 20 participants.

Application: Please send a mail to Nikolaus Wolf (nikolaus.wolf@wiwi.hu-berlin.de) February 15 until March 31, 2025. If there are more applicants than spots, we will make a lottery in advance and let you know about the result.

Term paper

709940	Political Violence and Conflict (englisch)					
4 SWS						
VL/UE	Mi	08-12	wöch. (1)	UNI 3, K12B	A. Hager, S. Sardoschau	
1) findet ab 23.04.2025 statt						

Course Content: The course explores the modern empirical study of political violence, coupling in-depth readings with a weekly replication of empirical findings in R. Our substantive focus is on the definition, causes, mitigants and consequences of violent political action. We will focus on the more recent academic literature, covering a variety of empirical methods including observational statistical analyses, quasi-experiments and field experiments. The class has a slight focus on violence in low-income countries, though other cases will also be discussed. The course material will assess some of the most pressing questions in the study of political violence: What types of violence do we observe and when do we call them "political?" Why is violence motivated on ethnic or religious grounds? How do violent groups ensure loyalty within their ranks? What are the human consequences of violence, specifically with regard to sexual assault? How can violence be mitigated? To tackle these questions, each week we consult influential academic papers drawing on works primarily in political science and economics. The course will be accompanied with an R tutorial where we replicate one paper per week, giving students hands-on experience in coding and replication. Students should have a good working knowledge of statistics and be willing to learn R. This course is co-taught with Prof. Anselm Hager. #BIM Berliner Institut für empirische Integrations- und Migrationsforschung

Learning objective: Students gain knowledge of recent advances in migration economics, particularly applied empirical analyses in the intersection of migration, economic development, political economy and labor economics with a focus on migration based changes in preferences, norms, and values in host and home communities. They are able to critically evaluate research on these topics and assess strengths and weaknesses of causal claims in economics papers. Students are equipped to present papers in an academic setting and replicate seminal papers. The students are able to identify gaps in the literature and develop research proposals that are empirically sound and add to the body of work in migration economics and political economy in a meaningful way.

Preconditions: The module "Econometric Methods" and a working knowledge of standard statistical methods or equivalent is strongly recommended. Students should have a working knowledge of statistics and be prepared to engage with R programming.

Ungraded work performance: Preparation of referee reports and problem sets.

709018	Studienabschlussseminar zu Themen der Angewandten Arbeitsmarktökonomik (englisch)					
2 SWS	SE	Do	12-14	wöch.	SPA 1, 342	S. Waights

This seminar offers bachelor and master students the opportunity to write an empirical thesis on a labor market topic. Participants are expected to perform an empirical analysis, discuss the relevant literature, data sources, methodology and to acquaint themselves with the necessary institutional details and to present and discuss their work. Generally, the seminar presentations will be held in English. Bachelor students may hold their presentations in German after consultation with the lecturer.

No credits can be earned for this seminar!

Please register until April 1, 2025 via e-mail to the secretariat of the Institute of Applied Microeconomics : kristin.schwier@hu-berlin.de

Organisatorisches:

Keine Leistungspunkte / no credit points.

709026	Thesis Seminar on Topics of Migration Economics (englisch)					
2 SWS	SE	Do	16-18	wöch.	SPA 1, 342	S. Sardoschau

This seminar provides both bachelor and master students with a comprehensive platform to author an empirical thesis centered on applied micro issues. Enrolled students will gain in-depth knowledge and practical experience in scientific writing, encompassing the acquisition of relevant data and the application of empirical methodologies. The course emphasizes the development of skills necessary for effectively structuring research papers and presenting findings. Participants are required to engage in empirical analysis, critically review pertinent literature and data sources, and become well-versed in scientific writing. Additionally, the program includes two opportunities for students to present and critique their work. While the seminar generally conducts presentations in English, bachelor students have the option to present in German, subject to prior approval from the lecturer.

Students should register by April 7th 2025 with Sulin Sardoschau directly: sulin.sardoschau@hu-berlin.de

Participation in this seminar is required for those writing a thesis with Prof. Sardoschau in 2025.

Keine Leistungspunkte / no credit points.

709022	Studienabschlussseminar zu Themen der dynamischen Makroökonomie (deutsch-englisch)					
1 SWS	SE	Mo	16-18	wöch. (1)	SPA 1, 21B	V. Schmidt
1) findet vom 28.04.2025 bis 16.06.2025 statt						

Das Studienabschlussseminar bietet Studierenden im Bachelor- und Masterstudium die Möglichkeit, eine Abschlussarbeit zu Themen der dynamischen Makroökonomie anzufertigen. Im Sommersemester 2025 werden die Seminartermine in der ersten Semesterhälfte liegen, beginnend am 17.04.2025. Direkt im Anschluss daran erfolgt die Anmeldung der Abschlussarbeiten im Studien-/Prüfungsbüro.

Es wird der Aufbau wissenschaftlicher Arbeiten behandelt. Weiterhin werden Methoden vertieft, die zum Arbeiten im Bereich der dynamischen Makroökonomie notwendig sind. Diesem Aufbau entspricht es, dass vor Anmeldung zum Seminar Vorkenntnisse in dynamischer Makroökonomik vorhanden sein müssen (d.h. ungefähr auf dem Niveau der Veranstaltungen "Monetary Economics" oder "Makroökonomie II"). Masterstudierende benötigen fortgeschrittene Kenntnisse in dynamischer Makroökonomie (d.h. ungefähr auf dem Niveau des "IAMA"-Kurses).

Nach Vergabe der Themen werden die Studierenden den anderen Seminarteilnehmer*innen die für ihre Arbeit jeweils relevante Literatur vorstellen. Zur Orientierung hinsichtlich des Schwierigkeitsgrads der relevanten Literatur dient das Lehrbuch: Gali, J. (2015). *Monetary Policy, Inflation and the Business Cycle* (2nd ed.). Princeton University Press. Die Seminarvorträge werden auf Englisch gehalten.

Anmeldungen zum Studienabschlussseminar bitte per E-Mail (bis zum 31.03.2025) an [wpol\(at\)hu-berlin.de](mailto:wpol(at)hu-berlin.de)

Bitte geben Sie dabei an, welche Veranstaltungen Sie bereits besucht haben (s.o.).

Das Studienabschluss-Seminar dient der Betreuung der Abschlussarbeit. Es werden keine LP vergeben.

709019 Studienabschlussseminar zu Themen der Wirtschaftsgeschichte (deutsch-englisch)

2 SWS	SE	Mo	10-12	wöch.	SPA 1, 21B	N. Wolf
-------	----	----	-------	-------	------------	---------

Das Studienabschlussseminar bietet Studierenden im Bachelor- und Masterstudium die Möglichkeit, eine Abschlussarbeit zu Themen der Wirtschaftsgeschichte anzufertigen. Es wird der Aufbau wissenschaftlicher Arbeiten behandelt. Weiterhin werden Methoden vertieft, die zum Arbeiten im Bereich der Wirtschaftsgeschichte notwendig sind. Diesem Aufbau entspricht es, dass vor Anmeldung zum Seminar Vorkenntnisse in der Wirtschaftsgeschichte vorhanden sein müssen. Bachelorstudierende müssen daher mindestens ein Seminar des Instituts (das SE "Angewandte Demographie" von Herrn Dr. Michel zählt nicht dazu) und Masterstudierende mindestens eine Lehrveranstaltung des Instituts besucht und erfolgreich bestanden haben. Nach Vergabe der Themen werden die Studierenden die für Ihre Arbeit jeweils relevante Literatur den anderen Seminarteilnehmern vorstellen. Die Seminarvorträge werden auf Englisch gehalten.

Anmeldung bitte per E-Mail (15.02.2025 bis 31.03.2025) an nikolaus.wolf@wiwi.hu-berlin.de

Maximale Teilnehmerzahl: 20

This course is designed for master's students. It provides an overview of a selection of current topics in development economics and equips students with practical knowledge and skills to conduct empirical micro development economic research. The course starts with a motivation for why we care about development economics, discussing poverty and the distribution of wealth within and across countries. It will then introduce practical skills for relevant empirical research methods including theoretical aspects of randomized controlled trials (RCT), the practical aspects and logistics of collecting data and implementing RCTs, and, if time suffices, common quasi-experimental designs used in development economics. The course discusses current topics in development economics, e.g., related to migration or gender, by critically reviewing papers that apply the empirical methods discussed. These topics and methods will be illustrated and trained through applications in Stata.

Focusing on a specific topic within microeconomic theory, the seminar studies recent developments in the literature of mechanism design, contract theory, industrial organization, and organization theory. Students discuss and present related research papers, pointing out their interrelations and discussing their main contributions. The seminar puts a particular emphasis on understanding the theoretical underpinning behind the papers' results and the economic mechanisms they capture. A major goal of the seminar is to find new open questions for future research. Participants are expected to attend all the sessions, read all the discussed papers beforehand, and participate actively in discussions.

707932 Deep Learning for Text Analytics (englisch)

2 SWS						
VL	Do	10-12	wöch.	SPA 1, 202	S. Lessmann	

The module Deep Learning for Text Analytics introduces students to recent developments in the scope of deep learning and natural language processing. We first examine different forms of artificial neural networks, which are the backbone of modern AI-Systems. Special emphasis is given to the analysis of sequential data like time-series. Next, textual data is introduced as a special form of sequential data. We elaborate on seminal approaches and contemporary practices to process textual data and the corresponding applications. Frameworks and practices to use advanced (deep) machine learning technology and deploy corresponding solutions are of critical importance and will be elaborated in tutorial sessions.

The topics covered in the module include but are not limited to:

- Fundamentals of artificial neural networks
- Recurrent and convolutional neural networks for sequential data processing
- Fundamentals of natural language processing (NLP)
- Word embedding and language models
- NLP transfer learning
- Recent developments in NLP and AI

The module is designed as a follow-up to the module Business Analytics and Data Science. We recommend students to first complete that module. More specifically, it is strongly recommended to join Deep Learning for Text Analytics with a solid understanding of machine learning practices and algorithms. Experience with Python programming is also expected since we use the Python programming language in tutorials.

Students who have passed the exam 707929 Advanced Data Analytics for Management Support are not allowed to take the module 707932 Deep Learning for Text Analytics!

1) findet ab 15.04.2025 statt

The module Applied Predictive Analytics (APA) gives students an opportunity to work on a real-life predictive modeling project. The module is organized as a seminar. Seminar topics and specific (modeling) tasks will be announced shortly before the begin of the seminar. Typically, topics/tasks relate to business decision problems, for example in the scope of marketing or finance. The students will work collaboratively on a topics in groups with two to four members. Generally speaking, seminar work will include literature research, academic writing, empirical analysis, programming, and the presentation of research outcomes.

APA offers students the opportunity to develop a variety of skills, including:

- Students further develop their teamwork and project management abilities, and learn about contemporary software tools for collaborative work (GitHub, Trello, Slack,...).
- Students further advance their experience with contemporary software packages for data science and machine learning.
- Students are able to develop advanced forecasting models using a variety of algorithms from statistics, machine learning, and other domains.
- Students advance their knowledge in data integration, preparation, and transformation, which allows them to create predictive variables from noisy real-world data sets.

The organization of the seminar comprises several stages. After forming a group and receiving a topic/task, students will start with some background research and discuss their progress in weekly consultation sessions with their topic supervisor. The second stage will consist of weekly sessions with group presentations and discussions. Thereafter, the groups will have time to finalize their seminar paper, which will be the basis for performance assessment and grading in the seminar.

It is understood that successful completion of the module Business Analytics and Data Science is a mandatory prerequisite to participate in the seminar.

Max. number of participants: 24. If there are more than 24 applicants, seminar places will be allocated by draw.

Application: 1.02. - 09.04.2025 on AGNES

This course deals with advanced estimation techniques in modern econometrics. In the first part we study Pesudo-ML and GMM as extremum estimation problems with special attention to asymptotic theory and the weak instruments problem. The second part covers non- and semi-parametric topics including the bootstrap, density estimation, and non- and semi-parametric regression. The third part covers the concept of econometric identification, and possible frameworks to write down and interpret causal estimands (treatment effects). We also discuss a number of techniques for estimation of treatment effects (IV, Diff-and-Diff, RDD, Matching).

Lecture: The course covers the quantification and simulation of quantitative spatial models. This entails: i) working with spatial data to generate the necessary model inputs; ii) setting, estimating, and inverting the primitives of the model; iii) using numerical procedures to solve for the spatial general equilibrium and conduct counterfactual analysis.

Exercise: Topics covered will include processing of spatial data, setting structural parameters, inverting fundamentals, and numerical simulation.

Recommended Module or Comparable Previous Knowledge: Students should have formal training in econometrics equivalent to "Advanced Econometrics" and in microeconomics equivalent to "Advanced Microeconomic Analysis". Experience in coding for data analysis is essential. Experience in using geographic information systems will be helpful.

Ungraded work performance: Multimedia presentation (30 min)

The BQSE seminar represents a focal point for knowledge exchange for staff and students pursuing quantitative spatial economics research in the Greater Berlin Metropolitan area. Seminar speakers are scholars who take space seriously in their quantitative research. Topics covered may relate to various fields of economics such as environment, history, labour, public, regional, trade, or urban.

The seminar is co-organized by a mix of junior and senior faculty from various academic institutions within and outside Berlin. It is a joint initiative of the School of Business and Economics at HU Berlin and the Center for Metropolitan Studies at TU Berlin. The co-organizers are grateful for the financial and logistical support provided by both institutions. Seminars are open to the wider public. See the [Website](#) for topics and further information.

The course provides an accessible but rigorous introduction to non- and semiparametric statistics. Classical methods for density estimation (histogram, kernel density estimation) and nonparametric regression (Nadaraya-Watson, local linear, k-nearest neighbors, additive models) are studied in detail. A central aim of the course is to explain the strong links between nonparametric statistics and modern machine learning methods such as random forests and deep neural networks. Finally, the course will cover tools for semiparametric inference on treatments effects using doubly-robust methods and machine learning.

The course "Research on Corporate Transparency" discusses the international regulatory framework of corporate transparency and how transparency affects corporate decision making and market outcomes. A special emphasis of the course will be on the scientific evidence in this field and on transparency issues that extend beyond financial markets like, for example, environmental and social issues.

The course will combine real-live case studies and empirical field work. So, it should be interesting to students that want to prepare for a corporate career predominantly in the area of accounting, finance or governance as well as for students that consider to write their Master's thesis in the area.

Portfolio: Students will work on three assignments during the semester. The first assignment is an individual empirical assignment. The second assignment is a group assignment, presenting and discussing a published paper during a 20 minute in-class presentation. The third assignment is a group assignment with an individual component. Taken together, these assignments will become a mini-webpage communicating selected course content to a general audience. All three assignments count equally towards the final grade.

Registration for the portfolio examination + possibility to withdraw: Until May 2, 2025

Integration der deutschen Ertragsteuern (Einkommen-, Körperschaft- und Gewerbesteuer) in gebräuchliche betriebswirtschaftliche Entscheidungsmodelle, um die Wirkungen auf die unternehmerische Entscheidung analysieren zu können. Der Schwerpunkt liegt dabei auf den Wirkungen der Besteuerung auf die unternehmerische Investitions- und Finanzierungsentscheidung im nationalen und internationalen Kontext. Grundkenntnisse der Unternehmensbesteuerung sind erwünscht.

Die Student/innen werden mit den steuerlichen Gegebenheiten im Fall der grenzüberschreitenden Wirtschaftstätigkeit im nationalen und internationalen Steuerrecht vertraut gemacht. Darüber hinaus werden Anknüpfungspunkte und Modelle zur Steueroptimierung im internationalen Konzern aufgezeigt. Dies geschieht beispielsweise im Zusammenhang mit Inbound- und Outbound-Investitionen sowie der grenzüberschreitenden Unternehmensfinanzierung. Fundierte Kenntnisse in Grundzügen der Unternehmens- und Konzernbesteuerung werden vorausgesetzt.

The goal of this seminar is to explore advanced topics in accounting. The organization of the course is twofold. The first 4 sessions (4 hours each) will be held by Prof. Böckem. In the first session (April 14, 2025), she will provide an overview of main areas of interest in IFRS financial statements. From the list of topics, participants shall choose and prepare an assignment. Participants have to settle for a topic of choice until April 25 2025 and inform Prof. Böckem accordingly. The assignment have to be submitted until May 30 2025.

In sessions 2-4 (April 28, May 5, May 12 2025; 4 hours each), Prof. Böckem will elaborate on IFRS requirements regarding group accounting. We will mainly explore the group and control definition under IFRS 10 based on several case studies. Furthermore, IFRS 11 and 12 as well as IAS 28 on equity accounting are presented. As classroom material is derived from real life situations, students will likewise gain experience in IFRSs application. Furthermore, students will extend their understanding of the institutional details of financial accounting by discussing current advanced topics of practical interest in the area of financial accounting and auditing and gain theoretical insights into the economic perspectives of accounting.

The final sessions of the course (June 16, June 23, June 30 2025) are reserved for participant's presentation.

Min number of students: 8

Max. number of participants: 20

The registration for the seminar takes place in the first session on April 14, 2025

Organisatorisches:

StO/PO MEMS 2016: 6 LP, Modul: "Advanced Topics and Cases in Accounting", Major: Accounting and Finance

Prüfung:

(Portfolio) Participants shall choose and prepare an assignment for a topic of choice. There will be not topic outlines provided. Participants can pick a topic of personal interest and choose how to present the issue. The written assignment shall comprise 10 pages. The written assignments account for 50% of the total grade. At the end of the seminar, the students also have to present their work. 25% of the grade will be derived from active, oral participation in the first four sessions of the course; active participation includes getting involved in discussions, answering questions, addressing questions in case issues remain unclear. Participation shall be oral, in limited circumstances there is room for researching real life cases as a homework. The final grade will be given/will be awarded for the portfolio of the assignments including the final presentation and active, oral participation in the first 4 sessions of the course.

The objective of the "Financial Accounting Research Group" (FARG) is to introduce select students to current research in financial accounting. Participants of the FARG will learn the necessary skills to understand conceptual underpinnings and common empirical design choices in this area of research.

The FARG is organized around the Finance-Accounting Research Seminar that provides a forum for invited guest speakers to present current research papers. Participants of the FARG are welcome to attend the accounting talks of this seminar and expected to join internal discussion meetings of our institute in preparation of these talks. There are usually three accounting talks and three preparatory discussion meetings per semester.

The FARG is targeted towards current PhD students in accounting and Master or Bachelor students who are interested in pursuing a PhD in accounting. Master students can obtain 6 ECTS by (i) participating in the FARG for at least two semesters and (ii) writing three reviews (or two reviews and a discussion protocol) on papers that are presented by our guest speakers. Bachelor students cannot obtain ECTS through the FARG, but they are very welcome to join our talks and discussion meetings for inspiration. Students who participated in the FARG for at least two semesters will receive a certificate that confirms their participation.

Enrolment into the FARG is possible at the beginning of each semester. Details on the application procedure will be announced in early March (summer term) and early October (winter term) via the website of our institute. The language of the seminar is English. The number of participants is limited to 20 students. We will base our choice of suitable students on § 90 ZSP-HU. Registration until 15 April 2025 via Email: u.brueggemann(at)hu-berlin.de

70 800 Master's Thesis Seminar Accounting (englisch)

2 SWS

SE	Fr	10-12	wöch. (1)	DOR 1, 005	J. Gassen
1) findet ab 25.04.2025 statt					

Moodle-Link:

<https://moodle.hu-berlin.de/course/view.php?id=130886>

The main objective of the seminar is to support each participant in developing a research project that is suitable for a Master's thesis at the Institute of Accounting and Auditing. Note that only those students who successfully completed this seminar are eligible to write a Master's thesis at the Institute of Accounting and Auditing. The number of participants is limited (max. 10 students). For more details, please check our website ([\).](#)

Prerequisites: Seminar participants are expected to have a sound understanding of accounting, corporate finance and econometrics.

Application period: February 1 – March 31, 2025. Later applications are possible as long as the maximum number of participants has not been reached.

Organisatorisches:

StO/PO MA 2016: 6 LP, Modul: "Master's Thesis Seminar Accounting"

StO/PO MEMS 2016: 6 LP, Modul: "Master's Thesis Seminar Accounting", Major: Accounting and Finance

Prüfung:

(Portfolio) Seminar participants have to complete three assignments in order to show their learning progress.

- The first assignment is to replicate and extend parts of an already published empirical paper. The goal is to provide the participants with the necessary skills to conduct each step of an empirical analysis (i.e., data preparation, data description and data analysis) on their own. Students will work on the first assignment during the first half of the seminar for about six weeks.
- The second assignment is to prepare a research proposal. The idea is that the participants use their insights from the first assignment and the seminar meetings to develop a proposal as a potential foundation for their Master's thesis. Students will work on the second assignment during the second half of the seminar for about six weeks.
- The third assignment is to present the research proposal during the last seminar meeting to all other participants as well as selected members of our institute. Students are also expected to discuss the proposals of the other participants.

The final grade will be given/will be awarded for the portfolio of all three assignments.

The objective of the Accounting Reading Group (ARG) is that students understand and critically evaluate state-of-the-art research in accounting. The ARG entails group discussions of papers that (i) identify fundamental questions in accounting research and (ii) use innovative methods to address such questions.

The ARG is targeted towards current PhD students in accounting and other students who are interested in pursuing a PhD in accounting. Master's students can obtain 6 ECTS by (i) actively participating during the reading group sessions and (ii) submitting an individual homework assignment at the end of the semester (e.g., an empirical replication of one of the papers discussed during the sessions). Bachelor students cannot obtain ECTS through the ARG, but they are very welcome to join our reading group sessions for inspiration.

Enrolment into the ARG is possible at the beginning of each semester. Details on the application procedure will be announced in early March (summer term) and early October (winter term) via the website of our institute. The language of the seminar is English. The number of participants is limited to 20 students. We will base our choice of suitable students on § 90 ZSP-HU. This course exposes students to two major areas in corporate finance: Conflicts of interests between the various stakeholders of a corporation and information asymmetries between insiders and outsiders. Both aspects have profound effects on firms' optimal financial strategies, such as capital structure, payout policy, risk management, and fund raising. This course also explores how corporate governance mechanisms can be used to align conflicts of interest between managers and shareholders. The course ends with a discussion of how to finance very large projects, which require billions of dollars.

Prerequisites: Finance Theory (70600) or equivalent knowledge.

The purpose of this seminar is to introduce students to empirical research topics and methods in finance and in financial intermediation, to prepare them for writing a Master thesis. In the first part of the seminar we will review some of the main econometric techniques such as regression analysis, time series models, panel data estimation, and event studies from an end user perspective. The second part of the seminar consists of student presentations of important research papers in finance and financial intermediation. In addition, students are required to replicate an empirical research paper with new data using Stata or R. Part of the seminar is an ungraded term paper.

Prerequisites: "Finance Theory" and at least 2 additional Master modules in Finance or closely related subjects.

To apply, please submit your application form <https://www.wiwi.hu-berlin.de/en/professuren/bwl/finance/study/application> to: finance-group@hu-berlin.de April 05, at latest.

In this lecture we offer a theoretical background to macroeconomic, psychological and microeconomic aspects of entrepreneurship. Among macroeconomic aspects we present the role of the entrepreneur in the national economy, economic growth and the value of entrepreneurship. Psychological aspects include the personality of the entrepreneur and a typology of entrepreneurs. Microeconomic aspects treat problems at firm level such as incentives in entrepreneurial teams and financing problems.

The course "Economics of Entrepreneurship" will provide two exams one for Bachelor (course number 70641) and one for Master (course number 70613) students attending the course. Master students, who already completed this course during their undergraduate studies, cannot take "Economics of Entrepreneurship" again.

In the summer term, this course is traditionally held in the form of a 4-day seminar trip outside of Berlin where the participants present their seminar papers on selected topics in front of the entire group. This ensures a more focussed working atmosphere, leading to best possible results.

No. of participants: max. 20

Registration deadline: Registration document can be downloaded from website of the chair (ebdm.wiwi.hu-berlin.de) and must be handed in via email to entre@wiwi.hu-berlin.de by March 31st, 2025. If more than 20 applications are received, participants will be selected randomly by a lottery draw.

The seminar covers various fields from the institute's research. Students write seminar papers on selected topics. Often, the seminar paper involves the design and implementation of a small experiment and/or the analysis of statistical data. See also announcement on the institutes website. Seminar participation is a requirement if you want to write a master thesis at our institute. Part of the Seminar: Ungraded presentation and discussion.

This seminar is designed for advanced Master and Ph.D. students who wish to deepen their knowledge of **managerial and personnel economics**. It focuses on the behavioral, experimental, and empirical research of the effects of organizational practices (e.g., **leadership, hierarchies, communication, corporate culture, new forms of work**) on employee behavior and productivity.

Participants are expected to develop their own research questions, critically review existing academic literature on the research question of their choice, conceptualize a study, collect data, and analyze it. Participants present results of their research during the block seminar days. Additionally, they write a research paper where they elaborate on the conducted research.

The choice of research methods should focus on the identification of causal relationships (e.g.: experiments, vignette studies, empirical causal analysis). Solid understanding of statistical methods and knowledge of statistical software (R, Stata, Python, Excel) may be highly beneficial.

During the block dates, participants will present their topic(s), research question, study design, data and first analyses, and collect feedback for this content.

The format of the seminar relies on the vivid exchange of ideas and thoughts among participants in the form of discussions and presentations during the block days. Therefore, the participants **must attend all block days**, actively participate in group discussions and hackathon, and present their ideas to the group. At the end of the semester, students submit a research paper summarizing and discussing their study and results. **All participants are encouraged** to work in groups and provide feedback to each other (especially if their research questions are related). However, the term paper includes individual efforts.

Max. participants: 20

Registration should be done before **31.03.2025** : [Registration Link](#)

Selection procedure: Students who have a case of hardship according to §90 (1) ZSP HU (health, social, disability or family reasons) will be given preference in the selection (evidence must be submitted during the period of application). Otherwise, the decision is made by lot.

VL/UE	Di	16-18	wöch.	SPA 1, 220	D. Klapper
	Mi	12-14	wöch.	SPA 1, 220	D. Klapper

The objective of the course will be to show you the benefits of using a systematic and analytical approach to marketing decision-making. An analytical approach will enable you to:

- Understand how the "first principles" of marketing strategy helps firms organize the analytics opportunity and challenge in today's data era, and
- Use and execute data analytic techniques, and case studies to understand how to solve marketing analytics problems in a scientific and process-driven manner.

Most analytic challenges that marketing researchers, consultants, and managers face, could be integrated under one umbrella that comprises four fundamental marketing problems:

- All customers are different
- All customers change
- All competitors react
- All resources are limited.

The course will then emphasize how the "first principles" of marketing strategy help solve the four fundamental marketing problems, and help students develop analytic competencies pertaining to each of the four first principles. Students will learn how to measure customer preferences, recognize different ways to segment markets, identify attractive customers to target, determine the best positioning of your brand, and develop new products that add value. Overall, by completing this course, students will be on your way to making the ROI case for marketing expenditures that companies are increasingly asking of their executives.

4 SWS					
VL/UE	Di	10-14	wöch.	SPA 1, 220	D. Guhl

The course focuses on experimental and quasi-experimental approaches to identify and infer causal relationships in a marketing context, such as the impact of online ads on website visits or price discounts on demand. Using counterfactual reasoning when optimizing marketing actions, the course covers various methods like difference-in-differences, regression discontinuity, instrumental variables, propensity score matching, synthetic control, and selection bias correction to estimate the causal effects. Students learn how to clearly assert identifying assumptions and how to explore the behavioral mechanism of a causal effect. Lastly, the course also teaches students how firms use customer data for targeting and how to evaluate these policies. In hands-on exercises, students will study academic marketing papers using causal inference and apply the statistical software R to reproduce/replicate the results (i.e., manage (potentially large) data sets, estimate causal effects, and communicate the findings). Preconditions: Modules "Marketing Management" and "Applied Econometrics" are recommended

Prüfung:

Written exam (90 min)

**709002 Einführung in das wissenschaftliche Arbeiten/Introduction to scientific work
(BA/MA)**

1 SWS

SE

D. Guhl,
N. Yegoryan

Dieser Kurs richtet sich an Studierende, die eine Seminar- oder Abschlussarbeit am Institut für Marketing schreiben. Er bietet keine zusätzlichen Credits und ist kein Ersatz für das reguläre Marketing-Seminar (siehe Voraussetzungen für **Bachelor** - und **Master** -Arbeiten). Der gesamte Stoff dieses digitalen (asynchronen) Kurses wird zum Selbststudium bereitgestellt. Es gibt keine Präsenzveranstaltungen, Sprechstunden, Aufgaben oder Noten. Der Kurs soll den Studierenden am Anfang einer Seminar- oder Abschlussarbeit am Institut für Marketing helfen und wir erwarten, dass die Studierenden die besprochenen Themen kennen und verstehen. Mit Hilfe mehrerer kurzer Videovorlesungen in Verbindung mit Folien und zusätzlichem Material lernen die Studierenden, wie sie 1) das Thema umreißen, inklusive der Entwicklung von Forschungsideen, der Definition von Forschungsfragen, der Suche und Durchsicht vorhandener Literatur, 2) verschiedene Arten wissenschaftlicher Arbeiten durchführen, 3) eine wissenschaftliche Arbeit (z.B. Seminar- und Abschlussarbeiten) verfassen, inklusive der Strukturierung der Arbeit, Richtlinien für das Zitieren vorhandener Literatur und die Formatierung der Arbeit, sowie Tipps und Do's and Don'ts für das Schreiben wissenschaftlicher Arbeiten.

This course is for students writing a seminar paper or a thesis at the Institute of Marketing. It does not provide additional credits and is not a substitute for a regular Marketing seminar (see prerequisites for **Bachelor** and **Master** theses). All the material in this digital (asynchronous) course is there for self-learning. There are no in-class meetings, office hours, assignments, or grades. The course is intended to help students at the beginning of a seminar or thesis at the Institute of Marketing, and we expect the students to know and understand the topics discussed. Through a series of short video lectures coupled with slides and additional material, students will learn how to 1) outline the topic, including developing research ideas, defining research questions, searching and reviewing existing literature, 2) conduct different types of scientific work, 3) write a scientific paper (e.g., seminar papers and theses), including how to structure the paper, guidelines on citing existing literature, guidelines in formatting the paper, as well as tips and dos and don'ts in scientific writing.

Einschreibung nicht über Agnes, Material über Moodle, Moodle-Key und Anmeldung nach Bedarf per E-Mail an: narine.yegoryan@hu-berlin.de und daniel.guhl@hu-berlin.de.

Organisatorisches:

Keine Leistungspunkte / no credit points.

Überfachlicher Wahlpflichtbereich

Siehe Vorlesungsverzeichnis/Überfachlicher Wahlpflichtbereich sowie Homepage des Career-Centers <https://www.hu-berlin.de/de/hu/verwaltung/ccww/> und des Sprachzentrums <https://www.sprachzentrum.hu-berlin.de/de>. Das Sprachzentrum der HU hat spezielle Sprachkurse für Wirtschaftswissenschaftler*innen im Angebot (Englisch + Spanisch).
